ALUR PRAVEEN

CYBERSECURITY | SOC ANALYST | NETWORK SECURITY
Hosapete, Karnataka | +91 9606077008 | alurpraveen4217@gmail.com

PROFESSIONAL SUMMARY

Information Science and Engineering student with hands-on exposure to vulnerability assessment, network traffic analysis, incident-response concepts and security tooling. Built cybersecurity projects covering consent-based footprint audits, packet-capture triage, SOC lab documentation and encrypted image steganography. Interested in entry-level SOC, cybersecurity analyst and VAPT opportunities.

TECHNICAL SKILLS

Security: Network Security, VAPT, Threat Analysis, SIEM fundamentals, Incident Response fundamentals, Linux/Kali Linux, Nmap, Wireshark, Burp Suite, Metasploit
Development: Java, JavaScript, TypeScript, React, Python/FastAPI, Tailwind CSS, JSON, HTML/CSS; Computer Networks, Operating Systems

PROJECTS

FootprintCheck | Consent-Based Public Footprint Auditing

- Designed a local-first, consent-scoped auditing application to review publicly available digital footprint evidence using configured sources such as Brave Search and GitHub APIs.
- Implemented a React/TypeScript dashboard and FastAPI backend architecture with source-status reporting, evidence grouping, retention controls, exportable reports and bounded network-fetch safeguards.

Network Traffic Triage Tool | Packet Investigation

- Developed a browser-based tool that locally analyses Wireshark CSV exports, summarising source/destination hosts and protocol distribution to support packet investigation.
- Added configurable detection thresholds, severity-labelled investigation findings, address/protocol filters and a searchable packet explorer; findings flag anomalies rather than proving threats.

SOC Homelab Tracker | SOC Learning Workspace

- Built a browser-based workspace to organise SOC homelab practice through phase tracking, lab inventory, detection logs, an investigation notebook and learning resources.
- Enabled device-local data storage with import/export backup to maintain lab progress, findings and analyst practice records.

StegoVault | Encrypted Image Steganography Lab

- Created a browser-only application that embeds and extracts text or files in images using RGB least-significant-bit (LSB) steganography and optional AES-256-GCM encryption.
- Implemented password-based key derivation, SHA-256 integrity checks, capacity validation and image-difference analysis (MSE/PSNR), with Web Workers for local processing.

INTERNSHIPS

Movidu Technologies Pvt. Ltd. | Jan 2026 - May 2026
- Gained practical exposure to vulnerability assessment, penetration testing, network security and incident-response procedures using Kali Linux, Nmap, Burp Suite and Wireshark; documented findings and remediation guidance.

InternPe | Apr 2025 - May 2025
- Practised frontend development concepts through small projects and hands-on technical exercises.

EDUCATION

B.E., Information Science and Engineering | Basaveshwar Engineering College, Bagalkot
Class XII: State Board, 2022 | **Class X:** CBSE, 2020

CERTIFICATIONS

Certified LLM Security Professional (CLLMSP) - Red Team Leaders | Cyber Crimes and Computer Forensics | Java for Artificial Intelligence | Mastercard Cybersecurity Job Simulation (Forage) | TATA Cybersecurity Job Simulation (Forage)

AWARDS & LEADERSHIP

IEEE AESS Bangalore Chapter Outstanding Student 2025. Served as Operating Committee Chairperson, BEC-IEEE Student Branch, and Secretary, IEEE AESS Chapter, supporting technical activities and networking.
